## DETAILED ACTION

### ***Acknowledgement***

1. Receipt is acknowledged of the Amendments to the Claims, and to the Remarks, both filed September 29, 2004. It is acknowledged that Claim 13 has been amended to overcome the objection cited in the Office Action mailed on June 29, 2004. However, the Applicant has yet to submit a new Oath/Declaration that identifies the citizenship of the inventor, as indicated in the Office Action cited above. The Applicant's arguments in his Remarks cited above are persuasive, and thus the claims are allowable for that reason, and for the reasons indicated below.

### ***Oath/Declaration***

2. Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth in the Office Action filed on June 29, 2004. The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability" (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in **ABANDONMENT** of the application. The transmittal letter accompanying the declaration (or oath)

should indicate the date of the "Notice of Allowance" (PTOL-85) and the application number in the upper right hand corner.

### ***Allowable Subject Matter***

3. Claims 1 – 37 are allowed.

4. The following is an examiner's statement of reasons for allowance: referring to claims 1 – 11 and 17 – 37, none of the references of record teach all the elements of these claims pertaining to the extraction of flat data from a hierarchical representation of a circuit that includes: (a) a processing sequence that selects an element during hierarchical traversal; (b) determines if flat data for the element has been previously stored; and (c) if flat data for the element has been previously stored, appends that data to an accumulated flat data related to the selected element.

Referring to claims 12 – 16, prior art does not teach the computer implemented system for extracting flat data from a hierarchical representation of a circuits that also includes: (a) a process for determining if a selected cell instance has a matching flat path data stored in the data structure; and (b) a process for retrieving the flat data path data for the matching cell from the first data structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
